PROJECT BRIEF

QT Parramatta is described as a **60-storey mixed-use development** with **265 hotel suites** and **367 residential apartments**. The five-star hotel occupies the ground floor through level 17, with residences above. Eateries, a gym, pool and sauna are also planned.

THE CHALLENGE

With the contractor pumping **Econopro** materials on site, maintaining adequate product stock and freight capacity depends on timely order notice. **Delivery restrictions** at the site add another scheduling constraint.

THE SOLUTION

RLA keeps in contact with the contractor and Hychem to monitor stock levels, arrange purchase orders when replenishment is needed, and coordinate suitable freight and delivery windows around site restrictions.

*** VALUE CHECK** Source document lists "$200,00.00"; confirm before publication.

CUSTOMER BENEFITS

During a site visit while material was being pumped, the contractor reported that the **Econopro product pumped well and flowed smoothly**. They expressed satisfaction with RLA's product and support, while noting that builder-imposed site restrictions could complicate deliveries.

BUILDER / CONTRACTOR FEEDBACK

The contractor's positive feedback focused on **application performance** and the support received from RLA. No separate direct testimonial was provided in the project submission.
